Please choose one organization and email them a request for an info session, you will receive a form to complete that asks: date, time, target audience, audio/visual equipment requirements, and catering options with associated costs.

The organization will take care of these logistics and advertise your event to the entire student population, unless otherwise indicated.

To reduce the number of events happening simultaneously, you are encouraged to begin your event at either 6pm or 7:30pm and keep it to one hour.
